This document carries the hope of establishing a means of peaceful CO-operation to facilitate a proactive solution to open the doors of communication to achieve a measured degree of closure for all parties concerned.

This is by no means the final step, but integral beginning of an ongoing effort to achieve peaceful resolution in our lifetime.

This document also carries the hope of being reworked into a version that can be accepted as NEW BILL that one day, could be introduced into Congress.

This document also carries the hope of providing the dialogue necessary to apply for specific federal funds to achieve these and other specifically related goals.

Thank you all for your time and consideration.
Peace, be unto you.
